PROFESSIONAL SUMMARY

Motivated **Software Developer** with hands-on experience in **full-stack development** and strong expertise in **Java**. Currently pursuing an **MCA** at **CEG** with a solid foundation in mathematics, algorithms, and **OOP** principles. A quick learner with a passion for new technologies and building efficient, scalable software solutions.

TECHNICAL SKILLS

Programming: Java, C, Python
Frontend & Backend: React.js, HTML5, CSS3, Node.js, Express.js, Spring Boot
Databases: MongoDB, PostgreSQL, MySQL
Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, AWS (Basic), Netlify, Railway
Core: OOPS, Data Structures, Algorithms, Computer Networks, Machine Learning RAG

EXPERIENCE

Java Software Developer Intern **Jun 2026 – Present**
Hinduja Tech Limited · Perungalathur, Chennai, Tamil Nadu, India

- Developed and maintained a full-stack College Portal using React.js, Spring Boot, Java, and MySQL, implementing course management, attendance tracking, results, and notice management features for students and faculty.
- Developed and integrated REST APIs, debugged application issues, and collaborated with team members using Git-based development practices to improve the reliability and maintainability of academic workflows.

PROJECTS

Aero Drum — IoT-Based Virtual Drumming System **Feb 2025 – Mar 2025**
GitHub Repository Link

- Developed an IoT-based virtual drumming system using Arduino Uno and dual MPU6050 sensors to capture 3D hand gestures through accelerometer and gyroscope data via a dual-address I2C configuration.
- Built a Python application using PySerial and Pygame to process sensor data and trigger low-latency drum sounds, enabling real-time gesture-controlled drumming.
- **Tech Stack:** Arduino, Python, MPU6050, I2C Protocol, PySerial, Pygame

Back Bone – Farmer Support & Cultivation Tracking Platform **Apr 2025 – Jun 2025**
GitHub Repository Link

- Developed an AI-validated farmer forum with expert verification and community feedback, integrated with a RAG-based agricultural chatbot to retrieve cultivation data and provide contextual analysis and decision-support assistance.
- Implemented Random Forest machine learning models for crop yield and market price prediction using historical farming data.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Python, Scikit-learn, HuggingFace API, REST APIs

HealthGuard AI – Integrated Diabetes & Multi-Disease Prediction System **Jun 2025 – Jul 2025**
Live Demo

- Developed a Logistic Regression-based diabetes risk prediction model using clinical health metrics, incorporating feature scaling and performance evaluation through ROC-AUC and confusion matrix analysis.
- Built a multi-class disease classification system using patient symptoms and clinical attributes, implementing preprocessing, label encoding, and deploying an interactive web interface using Streamlit.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Streamlit, Joblib

EDUCATION

Master of Computer Applications, College of Engineering Guindy **CGPA: 7.01**
Chennai (2024–2026)

B.Sc. Mathematics, Dr. M.G.R. Chockalingam Arts College **CGPA: 8.37**
Arni, Tiruvannamalai (2020–2023)

ACHIEVEMENTS & AWARDS

First Place – ADZAP Competition, Madras Christian College **Feb 2024**
Overall Champions – Techwoods'25 (MCA Technical Event) **Feb 2024**
Active Problem Solver – Solved 200+ Data Structures and Algorithms problems on LeetCode

CERTIFICATIONS & COURSEWORK

Java Programming: Structured coursework on OOP concepts, data structures, algorithms, and application development.
Machine Learning Algorithms: Coursework on fundamental ML concepts, algorithm implementations, and model evaluation. *Certificate Link*
